Profit after tax and minority interest increased from US\$5.4 million to US\$ 6.3 million – an increase of 17.0%.

Sales to Russia rose by 54.4% as the Group continued to introduce its market leading MacCoffee products into new cities and regions in the country. In Eastern Europe and Central Asia sales rose by 23.7% while in the Group's other markets, such as the Middle East and Mongolia, sales were up by 31.5%.

The Group also completed the launch of its new product packaging in Russia and the CIS countries, having successfully launched the new look products in Ukraine and Kazakhstan in 2007.

The Group Chairman and Managing Director, Mr Tan Wang Cheow said, "The launch of the new product packaging is part of our strategy to maintain MacCoffee's position as the dominant brand in its class."

"The new packaging helps reinforce the brand loyalty of existing customers as well as appeal to a younger generation of consumers. The launch was supported by extensive advertising and promotion." Mr Tan said.

The 17.0% increase in profit after taxation and minority interest was achieved during a period of high raw material prices, rising staff costs and expenditure on brand building activities associated with the newly repackaged products.

As the global economic outlook now looks dimmer and more volatile, especially in the currencies of the countries that we operate in, the Group expects its traditionally strong fourth quarter to be very challenging. In response to the worsening economic conditions, the Group will continue to control costs and better manage working capital.
